

Guns and bead guns

Accessories

BM C6 Cold paint gun

Automatic high-performance gun made of brass.
Nozzle of 6 mm makes it possible to do lines in widths ranging from 8-100 cm depending on the number of guns. An air capacity of 300-700 L/min. is needed per gun. Manual regulation for paint quantity.
The complete gun consists of gun, nozzle set, valve and hose kit, limitation collar and holder. Easy maintenance. Suited for all small and medium-sized roadmarking machines.

BM C12 Cold paint gun

Automatic high-performance gun made of stainless steel. Nozzles from 6-10 mm make it possible to do lines in widths ranging from 10-100 cm depending on the number of guns and the nozzle sets chosen. An air capacity of 500-1000 L/min. is needed per gun. The complete gun consists of gun, nozzle set, valve and hose kit, limitation collar and holder. Easy maintenance. Suited for high-speed roadmarking trucks.

BM Cold paint airless gun

Automatic high-performance spray gun made of brass and steel. Nozzle set for water based, solvent based and solid paints are available. Possibility to apply road marking in width from 8-100 cm depending on the number of spray guns - 3-5 guns.

BM SP3000 Sprayplastic gun

Automatic high-capacity sprayplastic gun. Consists of oiljacketed gun body and piston cylinder with fittings. Different nozzle sets make it possible to do lines in widths ranging from 10-50 cm depending on the number of guns and the nozzle sets chosen. A minimum air capacity of 600 L/min. is needed per gun. The complete gun consists of gun, nozzle set for atomising air and valve and hose set for control air.

BM C20 Bead gun

Automatic bead gun without atomising air for all sizes of beads. Gun parts made of brass and steel. Easy replaceable dispenser section in 12, 15 or 20 cm widths. A minimum air capacity of 40 L/min. is needed per gun. Easy maintenance; suited for all roadmarking machines with low compressor air capacity and when high dosage of beads is needed. Constant bead distribution with manual regulation of bead quantity. The complete gun consists of gun, dispenser, valve/tube set and holder.

BM C30 Bead gun

Automatic bead gun with atomising air for bead application. Gun parts made of brass and steel. Delivers glass beads at a rate of up to 21 kg/min. A minimum air capacity of 200 L/min. is needed per gun. Easy maintenance. Suited for all roadmarking machines with compressor air. Constant bead distribution with manual regulation of bead quantity. The complete gun consists of gun, nozzle, valve/hose kit and holder.
