

LOOKING FOR A
DEDICATED PARTNER
IN ROAD MARKING?

The new Borum generation has arrived

Developed with the user in mind, the brand new Borum® Master series is true to Borum's straightforward way of thinking. This next generation of road marking machinery offers a number of significant benefits:

- To allow for 9 consecutive hours on the road without refuelling, the diesel tank capacity has been increased to 180 L.
- To improve safety, a low engine-room cover offers full rear view
- To facilitate maintenance and limit the need for stock carrying, many more components have been standardised
- To make cleaning and inspection easier, the oil coolers have been placed outside the engine room. This also reduces the temperature inside the engine room.

And these are just a few of the new features that will optimise your working day when you choose Borum® Master for your upcoming projects. Please visit www.borum.as or contact your local Borum representative for more detailed information about the many possibilities of the Borum® Master series.

A customer's point of view

The German company Markierung NF were the first company to purchase the new Borum® Master 3000. Owner of the company, Frank Buhmann, says: „We purchased the first BORUM machine in 2003, and now we have 5! The most important thing in our business is the durability and efficiency of the machinery as the working season is not so long. This also means that we can't waste time for repair jobs and so on. And BORUM machines are very reliable with a constant high performance. My trust in Borum, based on my experience, is also the reason that I invested in the new Borum® Master 3000.”

Double up on production capacity

The first turf has just been cut to a significant expansion of Borum's production area in Denmark. Another 1650 m² are expected to be ready for commissioning

by the end of this year, which more than doubles the space and consequently makes for an even more efficient production line.

Meet us all over the world

As always, we are keen to meet our customers face-to-face and show you our latest product developments. In the next few months we will be attending exhibitions and fairs on at least three different continents:

Trafic 2009, Madrid 27-30 October
TranspoQuip, Sao Paulo, Brazil..... 17-19 November
Gulf Traffic, Dubai..... 6-8 December

Trade Fairs

Autumn 2009

So far, Borum will be attending the following fairs in the autumn of 2009

Trafic 2009, Madrid

27-30 October 2009

Stand no. 7C15

TranspoQuip, Sao Paulo, Brazil
